450+ New Tools with 7 Brand New Product Lines

Delivering Advanced Composite Cutting Tools

Composite machining presents a unique set of challenges. At CoreHog, we've risen to the occasion. Our tools are on the forefront of technology, exhibiting the most modern geometries available for the machining of composite, CFRP, and honeycomb core materials.

Taking You Further at the Spindle

At CoreHog, we pride ourselves on our ability to elevate your composite cutting skill. We design, engineer, and manufacture our products specifically to avoid common composite cutting woes, such as delamination and push-out, uncut fibers, and tear-out.

Making You an Industry Leader

We're proud of our loyal customers – learning of their successes is what keeps us fueled. Machinists who choose CoreHog are at the pinnacle of their craft, and consistently win in markets ranging from Aerospace, Space Systems, Defense Systems, Auto Racing, and Naval Technologies.

> Harvey Performance Company combines the leading Harvey Tool, Helical Solutions, Micro 100, Titan USA, and CoreHog brands to provide world class tooling, unmatched service, and innovative solutions that increase productivity for our customers.

Coatings Chart

	DLC	CVD	PCD	ZrN
	Diamond-Like coating has extremely sharp edges, improving lubricity and wear resistance in low temperature threshold applications of non-ferrous materials.	True Crystalline Diamond coating is grown directly onto a cutting tool, dramatically improving hardness, abrasion resistance, and feed rates in non-ferrous machining applications.	Thick diamond layer brazed onto solid carbide body provides outstanding micro hardness and abrasion resistance in low temperature threshold applications of non-ferrous materials.	Provides higher hardness, lubricity, and abrasion resistance over uncoated tooling when machining a variety of non-ferrous materials.
Max. Working Temp.	600° F	1,100° F	1,100° F	1,100° F
Microhardness (HV 0.05)	2,400 (24 GPa)	8,973 - 9,993 (88 - 98 GPa)	8,973 - 9,993 (88 - 98 GPa)	2,243 (22 GPa)
Coeffecient of Friction	.051	.0530	.0520	.40
Coating Thickness	1 - 4 µm	3 - 18 µm	.010"030" Solid PCD Layer	2 - 5 µm
Structure	Mono-Layer	True Crystalline CVD Multi-Layer	Polycrystalline Diamond	Mono-Layer
Coating Color	Black	Gray	Gray / Black	Light Gold / Champagne

	TiN	TiCN	TiAIN
	High hardness general purpose coating improves overall tool life and lubricity when machining ferrous materials and in applications that do not generate excessive heat.	Maintains high surface hardness and increases abrasion wear resistance to improve overall tool life in lower temperature applications.	High heat and wear resistant coating that maintains high surface hardness at elevated temperatures for improved tool life and faster feed rates when machining ferrous materials.
Max. Working Temp.	1,000° F 750° F		1,300° F
Microhardness (HV 0.05)	2,400 (24 GPa)	3,500 (34 GPa)	3,400 - 3,600 (24-36 GPa)
Coeffecient of Friction	.40	.25	.60
Coating Thickness	2 - 5 µm	1 - 4 µm	1 – 4 µm
Structure	Mono-Layer	Mono-Layer	Multi-Layer
Coating Color	Gold	Gray / Silver	Dark Gray / Black

Increase Cutting Tool Performance and Wear

Increase cutting tool performance in wear resistance, abrasion prevention, corrosion, and oxidation at high temperatures.

CoreHog's assembly style tooling allows for the selection of tools designed for specific materials, densities, and manufacturing styles. Different configurations increase efficiency, decrease costs, and provide you with machining flexibility.

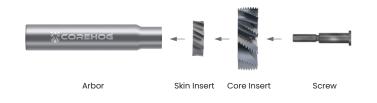

30 Rebating Cutters

The unique design of this modular-style tooling reduces setups, cost per cutter, and allows for flexibility with varying sandwich panel configurations.

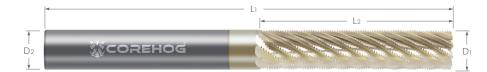

Coreslicer Edge Options

CoreHog's offerings of Smooth, Staggered Tooth, Sawtooth, and Wavy Coreslicers are each specially engineered to provide flag-free finishes and outstanding tool life in the materials and densities for which they are optimized. See the chart below to identify which edge option is best for your application.

Соленов		Соленов	COREHOG	COREHOG
	Smooth	Staggered Tooth	Sawtooth	Wavy
	Designed for all densities of Kevlar® and Nomex® and lighter density aluminum core of 5 pounds or less.	Engineered for medium density aluminum core weighing between 6 and 8 pounds.	Designed for machining heavier density Aluminum core weighing over 8 pounds.	Engineered to machine mixed density honeycomb core materials with hard epoxied bond lines.

Roughing Core Tools CoreHoggers - Square

- Designed for increased productivity and increased MRR when roughing high density honeycomb core materials
- Used for bulk material removal of honeycomb composite materials including Nomex[®], Kevlar[®], phenolic, and glass
- Provides excellent performance when roughing and finishing foam materials like Rohacell®, poly foam, and Styrofoam
- Complex geometry reduces tool pressure by utilizing sharp sheering action which results in less part movement and increased speeds & feeds
- Center cutting
- ZrN coating offers higher hardness and added lubricity for maximum performance
- Solid carbide
- Precision manufactured in the USA

Finishing Core Tools Small CoreHoggers

- Must be paired with Small Coreslicer for use. For proper pairing, reference "Assembly Pairing Guide"
- Eliminates risk of material wrapping around the spindle by disintegrating them as they approach the face of the slicer
- Long reach design optimized for reaching into small, closed features such as pockets, joggles, and closed walls
- TiCN coating for extended tool life and improved wear resistance
- High speed steel
- Precision manufactured in the USA

1.500 / 45 mm	C83666	112.00

Valve Stem Cutters Integral Shank

- Excellent for finish bevel or knife edge parts
- Often used to separate the knife edge from the surrounding material with parting off motion
- Integral shank design provides more side clearance for machining hard to reach or high depth side cuts
- Tapered neck for added clearance
- TiCN coating for extended tool life and improved wear resistance
- Solid carbide
- Precision manufactured in the USA

Valve Stem Cutters Single Bevel Core Saws

- Engineered for obtaining superior finishes on exterior walls while reducing the need of risers on fixtures
- Unique design allows the spindle to be utilized at a 90° angle to finish trim part profiles
- TiN coating for excellent hardness and improved lubricity
- Pairs well with any standard arbor
- High speed steel
- Precision manufactured in Germany

Diameter	Thickness	Arbor Hole	Flutes	TiN Co	ated

Wall Finishing Tools CoreHoggers - Left Hand

- Engineered to provide smooth vertical walls in aramid honeycomb materials
- Ideal for maintaining cut direction for reverse parts to prevent ribbon tearing
- Designed to produce flag-free finishes with 3-axis machines
- Minimal equipment or complex tool path motions required

Center cutting

- ZrN coating offers higher hardness and added lubricity for maximum performance
- Solid carbide
- Precision manufactured in the USA

Sandwich Panel Cutters

- Designed for machining sandwich panels in one pass
- Engineered to eliminate manual clean up of parts after machining, while increasing cutting rates by up to 300% over conventional cutters
- Provides excellent performance in CFRP, Nomex[®], and Kevlar[®] bonded panels
- Optimized for outside trimming and slotting applications, or milling fastener cutouts
- Can be used in flat bottom areas when needed for bonding in fasteners
- Geometry allows for free cutting while maintaining excellent tool life and finishes with minimal flagging and fuzz
- Center cutting
- DLC coating for improved lubricity and wear resistance
- Solid carbide
- Precision manufactured in the USA

Sandwich Panel Cutters - Compression Cutters

- Engineered to eliminate manual clean up of parts after machining, while increasing cutting rates by up to 300% over conventional cutters
- Excellent choice for eliminating Tedlar[®] fray on sandwich panels skinned with Tedlar[®]
- Provides excellent performance in CFRP, Nomex[®], and Kevlar[®] bonded panels
- Optimized for outside trimming and slotting applications, or milling fastener cutouts
- Can be used in flat bottom areas when needed for bonding in fasteners
- Geometry allows for free cutting while maintaining excellent tool life and finishes with minimal flagging and fuzz
- Center cutting
- DLC coating for improved lubricity and wear resistance
- Solid carbide
- Precision manufactured in the USA

Rebating Cutters Integrated Shank

- Optimized for removing material between face sheets on honeycomb core sandwich panel
- Designed for increased productivity and increased MRR when cutting honeycomb core materials
- Geometry reduces tearing, flagging, and fuzz, while providing a rebated area to allow for edge filling or fasteners
- Excellent for outside edges as well as internal circular or rectangular rebate requirements
- Center cutting
- Solid carbide
- Precision manufactured in the USA

Rebating Cutters Core Insert

- Must be paired with Rebating Cutter Arbors for use. For proper pairing, reference "Assembly Size Pairing" below
- Design reduces setups, cost per cutter, and provides flexibility with varying sandwich panel configurations
- Optimized for removing material between face sheets on honeycomb core sandwich panel
- Excellent for outside edges as well as internal circular or rectangular rebate requirements
- Complex geometry reduces tearing, flagging, and fuzz while providing a rebated area to allow for edge filling or fasteners later on
- TiAIN coating for high hardness and high temperature resistance
- Solid carbide
- Precision manufactured in the USA

CFRP MAX Routers Burr End Style - Upcut

- Designed to provide high feed rates while maintaining excellent finish
- Free cutting geometry minimizes delamination
- Optimized for trimming CFRP and provides excellent performance in S-glass and other fiberglass materials
- Burr style end allows for ramping, not suited for plunge cutting
- True crystalline CVD diamond coating for drastically improved hardness for outstanding abrasion resistance and higher feed rates
- Solid carbide
- Precision manufactured in the USA

Laminate Kevlar Cutters Compression Style

- Engineered for high performance in laminated Kevlar[®]
- Compression geometry and high edge sharpness ensure cleanly cut Kevlar[®] with minimized fraying
- Cuts low resin/high fiber Kevlar® cleanly, reducing the need for manual rework of frayed parts
- Center cutting
- Solid carbide
- Precision manufactured in the USA

PCD Diamond End Mills Square

- Free cutting geometry minimizes delamination and provides excellent part finish
- Provides excellent performance in tough materials like G10 glass and carbon fiber
- PCD diamond brazed onto solid carbide body for outstanding microhardness and abrasion resistance for significant improvement in tool life
- Center cutting
- Precision manufactured in Italy

CFRP Drills

- Provides superior results in CFRP while delivering excellent performance in other laminate and stack composite materials
- Specially engineered geometry allows for outstanding tool life, finish, and repeatability while eliminating edge swelling, tear out, and delamination
- Designed with high strength and rigidity while maintaining tight tolerance
- For use in both hand and CNC drilling operations
- True crystalline CVD diamond coating for drastically improved hardness for outstanding abrasion resistance and higher feed rates
- Solid carbide
- Precision manufactured in the USA

NEW ITEMS

Helical Step Drills

- Proprietary multi-stepped nose design spreads out load, eliminating delamination and burr on exit
- Designed to produce tight toleranced holes with minimal tool pressure
- Suitable for use in a wide range of composites and plastics
- Engineered to improve hole finish
- For use in both hand and CNC operations

- DLC coating for improved lubricity and wear resistance
- True crystalline CVD diamond coating for drastically improved hardness for outstanding abrasion resistance and higher feed rates
- Solid carbide
- Precision manufactured in the USA

Tapered Drill Reamers

- Multi-purpose tooling can be used to drill and ream in a one-shot operation
- 4 flute design and special "long nose" geometry greatly reduces delamination by avoiding grabbing or pushing on plies
- Engineered to produce tight toleranced holes in composite laminates
- Suitable for use in a wide range of composites and plastics
- For use in both hand and CNC operations
- DLC coating for improved lubricity and wear resistance
- True crystalline CVD diamond coating for drastically improved hardness for outstanding abrasion resistance and higher feed rates
- Solid carbide
- Precision manufactured in the USA

8 Facet Drills

NEW ITEMS

- 8 Facet design efficiently spreads out tool pressure throughout the cut, reducing delamination on exit
- High strength design maximizes MRR
- Suitable for use in a wide range of composites and plastics
- For use in hand and CNC operations
- DLC coating for improved lubricity and wear resistance
- True crystalline CVD diamond coating for drastically improved hardness for outstanding abrasion resistance and higher feed rates
- Solid carbide
- Precision manufactured in the USA

Dagger Drills

- An ideal choice for hand drilling composites in assembly applications
- Can be reground without modifying point geometry
- Suitable for use in a wide range of composites
- Can also be used in CNC operations for added versatility
- DLC coating for improved lubricity and wear resistance
- Solid carbide
- Precision manufactured in the USA

Countersinks PCD Diamond

- Provides excellent performance in abrasive materials like CFRP, fiberglass, and Kevlar[®]
- Achieve up to 50x the tool life over high speed steel or carbide tools
- Superior tool life

- For use in both hand and CNC operations
- PCD diamond brazed onto solid carbide body for outstanding microhardness and abrasion resistance for significant improvement in tool life
- Precision manufactured in Italy

Countersinks Interchangeable Pilot

- Interchangeable pilot design ensures countersink is concentric around the hole
- Interchangeable design allows for added versatility
- Provides excellent performance in abrasive materials like CFRP, fiberglass, and Kevlar[®]
- Specially designed for aircraft manufacturing with use of handheld pneumatic drill
- Steel
- Precision manufactured in the USA

Navigating Our Website Is Easier Than Ever

Place an order with your distributor on corehog.com

Did you know that you can place a CoreHog order directly to your distributor from our website? After creating your corehog.com account, you're able to build and send "shopping carts" directly to your participating distributor to order.

Once logged in, create your own personalized Shopping Carts of CoreHog tools you're most interested in, then send it directly to a participating distributor, or share it with a colleague or purchasing agent.

Expansive Stock Check

Check real-time availability of as many as 50 tools at once to simplify the order planning process and spend more time where it counts: at the spindle.

"Smart-Search" Feature

Simply and quickly search for a CoreHog tool, then receive results for its product page, as well as for every technical resource relevant to that tool, presented in one click to save you valuable time and money.

Product Table Filtering

Find the perfect CoreHog tool for your job quickly and easily by using new filtering functionality on each product table, sorting through an expansive and always growing product offering.

Join Our Email List

Scan the QR code to sign up for our email list! Our weekly email delivers valuable information about CoreHog products and technical resources directly to your inbox. Be the first to know of newly released tools to gain an immediate leg-up on the competition!

At CoreHog, we go the extra mile to ensure that your next CNC composite machining operation excels at every turn. Beyond the meticulous care and detail we put into each and every cutting tool we sell, we supply you with comprehensive and reliable speeds and feeds charts to allow you to achieve the most from your product. We also fully stock each of our products to guarantee that your cutting tool solutions reach your shop quicker. Further, our team of technical support representatives is available and always willing to help you with every detail of your application.

We've calculated Speeds & Feeds so you don't have to! Download our printer friendly PDFs for every applicable cutting tool to save valuable programming time.

Save Time & Money

Find all the running parameters you need, calculations account for multiple types of composite materials and the application that you are using to lower overall production costs.

Educational

Resources

Increase Tool Life

Get the most out of every tool you order from us with running parameters designed to decrease breakage and maximize tool life.

Minimize Damage

Speeds and feeds along with specialized geometries of the tool help minimize material failures such as delamination, tear out, and poor finish.

In The Loupe

Machinist Blog - In The Loupe Your Source for Machining Solutions including technical tips & machining how-to's.

In The Loupe - TV

This new YouTube series delivers answers to the cutting tool questions all machinists ask. Follow along as new episodes of In The Loupe TV are added regularly.

Our LARGEST **Expansion Yet**

CoreHog's new 2023 Product Catalog offers more than 450 new CNC cutting tools optimized for the machining of composite materials, nearing doubling the size of our previous offering.

Our latest innovations, including our new CFRP Drill, which features advanced geometry for unmatched CFRP drilling, provide you with maximized machining efficiency, accuracy, and consistency. Our improved offering also includes Potted Fastener Cutters, Compression Style CFRP Routers, Compression Style Laminate Kevlar® Cutters, and more.

Resources to Simplify Your Cutting Tool Search

CoreHog's premium offering of composite-optimized cutting tools is backed by several website resources, each engineered to simplify your ordering process and enhance your overall CoreHog experience!
